

COVID-19 Provider Compensation Rate Sheet & Position Paper

The COVID-19 crisis is creating unprecedented challenges as providers around the country work to coordinate valuable professional resources. Many physicians and advanced practice providers (APPs) are performing services outside their usual scope, which may or may not be billable. Providers are also being asked to work additional shifts. We recognize that appropriate payments to providers may fall outside of existing arrangements.

Regulatory groups have provided waivers for Fair Market Value (FMV) requirements. Still, clients and their attorneys have approached us with concerns that payments to providers should be reasonable, wanting to work with some guidance so that once we get through the crisis, there is better documentation to support the transition to new arrangements.

The team at Pinnacle applauds the efforts of care givers to treat those afflicted with the COVID-19 virus. We cannot ease the patient care burden; however, we can help advance information to support the consistency and reasonableness of payments to physicians and APPs.

We have developed a rate sheet and position paper that is intended to provide guidance related to provider compensation for healthcare organizations responding to the national, regional and local states of emergency resulting from the COVID-19 outbreak. The rate sheet and position paper are intended to provide current market information for several key specialties and serve as a general reference regarding FMV compensation.
