

Is it Time to Reassess Your Value-Based Care Approach ?

Many health systems are challenged to assess, understand, and meet patient demand. Pinnacle can assist in building an infrastructure that serves your entire population. Identifying and supporting those most at risk through population stratification and segmentation, focused telephonic triage, reduction in inefficient processes are all key initiatives for success. We help by creating a team-based model to better support value-based care with clear workflows, roles, responsibilities and metrics.

Services Provided Based on Areas of Expertise:

- Ambulatory practice gap analysis
- Acute/Ambulatory care management gap analysis
- Development of key centralized structures (telephonic triage, after hours support, transitional care management, pre-visit planning)
- Build post-acute high performing integrated network
- Development of high reliability organization
- Ensure fiscal responsibility through highly efficient, outcome focused care model
- Improvement of workflows, processes and tools
- Motivate providers and care teams to practice at the top of their license/scope
- Reduce length of stay, readmissions and potential reoccurrence of complications
- Develop and implement telehealth plan
- Improve HCC score through proper documentation and coding
- Increase provider and patient satisfaction
